

## Human Subjects Research Protection

NYU Shanghai Institutional Review Board (IRB) is an independent administrative body to ensure compliance with relevant human subjects welfare regulations, policy, and guidelines concerning human subjects in research projects. The IRB has the authority to approve, require modifications in, or disapprove research involving human subjects activities (funded or unfunded) conducted by NYU Shanghai faculty and students.

The Human Subjects Research Protection team (Office of Research) supports the research community through

- providing guidance to protocol submission requirements;
- coordinating protocol submissions and IRB reviews.

Email: [RCOinfo@nyu.edu](mailto:RCOinfo@nyu.edu)

## Research Partnership

The Research Partnerships team (Office of Research) aims to connect our faculty with external partners, linking them to research opportunities and resources.

The team is also responsible for coordinating the N.E.T. (NYU Shanghai/ECNU Joint Graduate Training Program), through which eligible NYU Shanghai faculty can advise ECNU graduate students.

# Research Resource Guide

## Sponsored Programs

---

The Research Grants team (Office of Research) provides pre-award support and training to faculty in their pursuit of research funding\* from Chinese and international sponsors.

- Identify and disseminate funding opportunities;
- Review and interpret sponsor guidelines for proposal preparation and submission;
- Facilitate the development of grant proposals;
- Coordinate internal review of proposals;
- Assist faculty with award acceptance and contracts signing with sponsors;
- Liaise with sponsors on administrative reporting (such as progress reporting and award close-out reporting).

The Research Grants team also coordinates with the Office of Sponsored Programs (OSP) at NYU Washington Square on faculty grants applied through NYU.

Website: [research.shanghai.nyu.edu/resources/research-grants](https://research.shanghai.nyu.edu/resources/research-grants)  
Email: [shanghai.researchgrants@nyu.edu](mailto:shanghai.researchgrants@nyu.edu)

\*Applications for the majority of talent grants are supported by the Department of Human Resources.

Website: [shanghai.nyu.edu/page/talent-programs](https://shanghai.nyu.edu/page/talent-programs)

## Budget and Financial Management for Research Grants

---

The Post-Award team (Finance) is responsible for all financial related post-award administration of research grants and contracts received at NYU Shanghai.

Key functions include budget review, project set-up and modification, financial analysis and reporting, financial monitoring, cost relocation, and compliance activities (e.g., audit).

Email: [shanghai.finance.help@nyu.edu](mailto:shanghai.finance.help@nyu.edu)

## Laboratory Support

---

From lab construction and daily operation to chemical management and waste disposal, the Department of Laboratory Management works with faculty, staff and students to provide an advanced lab environment that ensures the safety of laboratories, campus buildings, and our university community as a whole. Alongside these crucial responsibilities, the department supports course work and research in labs throughout campus and introduces scientific literacy to the university community.

In collaboration with the Campus safety/EHS, Facility Management, and the Office of Research, the lab team is building and improving university lab policies in key areas including lab safety, emergency response, and lab registration to implement safe and high efficient environment throughout NYU Shanghai laboratories.

Email: [shanghai.labs@nyu.edu](mailto:shanghai.labs@nyu.edu)

## Environmental Health and Safety

---

The EHS team (Campus Safety) aims to promote a safe, healthy and environmentally sustainable place for the university community by implementing the programs and procedures of training, safety inspection, risk assessment, chemicals / drugs / bioreagent / wastes management and occupational health, etc.

Website: [shanghai.nyu.edu/ehs](https://shanghai.nyu.edu/ehs)  
Email: [shanghai.safety@nyu.edu](mailto:shanghai.safety@nyu.edu)

## Responsible Conduct of Research

---

The Responsible Conduct of Research (RCR) serves as a foundation for maintaining the integrity and credibility of scientific inquiry. It promotes honesty, transparency, and accountability across all stages of research, from design to publication. The RCR program offers trainings on best practices and responsible conduct. While some funders may require specific RCR training, all researchers are expected to follow RCR best practices regardless of funding.

## Technology Transfer

---

NYU Shanghai is dedicated to the application and dissemination of knowledge by protecting and promoting efficient commercial development of university discoveries for the benefit of society. The Office of Technology Opportunities & Ventures (TOV) of NYU New York is the gateway to the University's technology transfer endeavors.

Website: [tov.med.nyu.edu](https://tov.med.nyu.edu)

## High Performance Computing

---

NYU Shanghai operates and supports High Performance Computing (HPC) resources and assists the NYU Shanghai research community in their use. HPC resources are open to NYU faculty and staff, and faculty-sponsored students, and may be used for class instruction.

The HPC team (IT) can help design network integration and system infrastructure in academic labs. They can also support research labs.
