

NYU SHANGHAI BOOST FUND

NYU Shanghai recognizes that faculty who receive strong funding support are more likely to progress quickly in their research. To further the success of faculty research, the **NYU Shanghai Boost Fund** will match faculty member's external competitive awards to maximize available funding.

Eligibility

All Tenured and Tenure-track PIs with successful, eligible external competitive awards to NYU Shanghai can apply¹.

Budget

Faculty with eligible external competitive awards can request matching funds, equivalent to 50% of the direct award funded, up to a maximum of RMB 400,000. However, faculty who significantly underspent (>20%) their last closed-out grant will likely receive a substantially reduced amount of matching funds, if any.

Apply

Requests should be submitted electronically as a single PDF document to shanghai.researchgrants@nyu.edu, using the following subject line format:

Boost Fund_*PI name*_*grant number* (if there is a grant number)

The request should include:

- A completed NYU Shanghai Boost Fund Application (see template provided)
- A copy of the sponsor's award notification letter of the associated external award

Deadline

Application deadlines are one year from the official grant start day (e.g., if the official grant start date is September 1st, 2021, the deadline will be August 31st, 2022).

Generally, we encourage faculty to submit applications to the NYU Shanghai Boost Fund during the same academic year that the award is made.

¹ The Office of Research keeps a record of funding streams that are excluded from this program.

Decision and Award Administration

Before making a final decision, the Office of Research will consult the faculty's dean. As recipients of the NYU Shanghai Boost Fund, faculty will be required to acknowledge the funding for any resulting publications or presentations as follows:

"This project was supported in whole (or in part) by the NYU Shanghai Boost Fund."

No additional reports will be required.

Inquiries

Please direct inquiries to shanghai.researchgrants@nyu.edu.
